Title: Smart Web-Based Student Task Management System with Priority and Deadline Analytics

Introduction

This system helps students organize their academic tasks in one platform. It would allow users to tract assignments, deadlines, and progress. Many students struggle with managing multiple tasks, which leads to missed deadlines. This web app provides a simple solution by centralizing all task-related information.

System Purpose

The purpose of this system is to help users manage tasks or projects efficiently. It allows students to create, update and monitor their tasks in real time. The system stores task details such as title, deadline, and status. It also provides a dashboard for quick tracking of progress.

Target Users

- Students
- Student groups handling academic projects

Features

- **Task Management (CRUD)**
  - Create, update, delete, and organize academic tasks.
- **Smart Priority System**
  - Automatically assigns priority levels based on deadline proximity and task difficulty.
- **Deadline Analytics**
  - Tracks upcoming, overdue, and completed tasks.
- **Dashboard Overview**
  - Displays task summaries, progress, and key insights.
- **Progress Tracking**
  - Shows completion rate and task history.
- **Reminder Notifications**
  - Alerts users about upcoming deadlines.
- **Task Categorization**
  - Organize tasks by subject or category
- **Group Collaboration**
  - Shared tasks for group projects.

Objectives

- To develop a web-based system that helps students manage academic tasks efficiently
- To implement a smart priority mechanism based on deadlines and task importance
- To provide a dashboard that visualizes task progress and workload

- To reduce missed deadlines through reminders and analytics
- To enhance student productivity and time management within university
